# Today's Topics

---

1. Prepare, Prepare, Prepare
2. Finances
3. Coming up with that Target List
4. Summary
5. Questions

# Preparation is Key

---

- This job market is enormously competitive
- Internet has helped and hurt candidates
  - Leveled the playing field, job opportunities are easier to find
  - More people are applying to those job opportunities
  - Networking still plays a crucial role in the hidden job market
- LinkedIn
  - 95%+ of recruiters use LinkedIn to search for candidates
  - Majority of LinkedIn profiles are awful!
- Resume
- Who Are Your References?

## Gather current statements including:

- Household budget
  - Monthly expenses for housing/food/utilities
- Banking/Savings
- Retirement accounts
- Loan obligations
- Other assets? Do you have things that you can sell?
- Status of your medical insurance?

Plan at least a three month search, longer if you:

- Are changing career fields
- Have 15+ years of experience
- Have a narrower career scope
- Live in a geographic area which does not cater to your career field

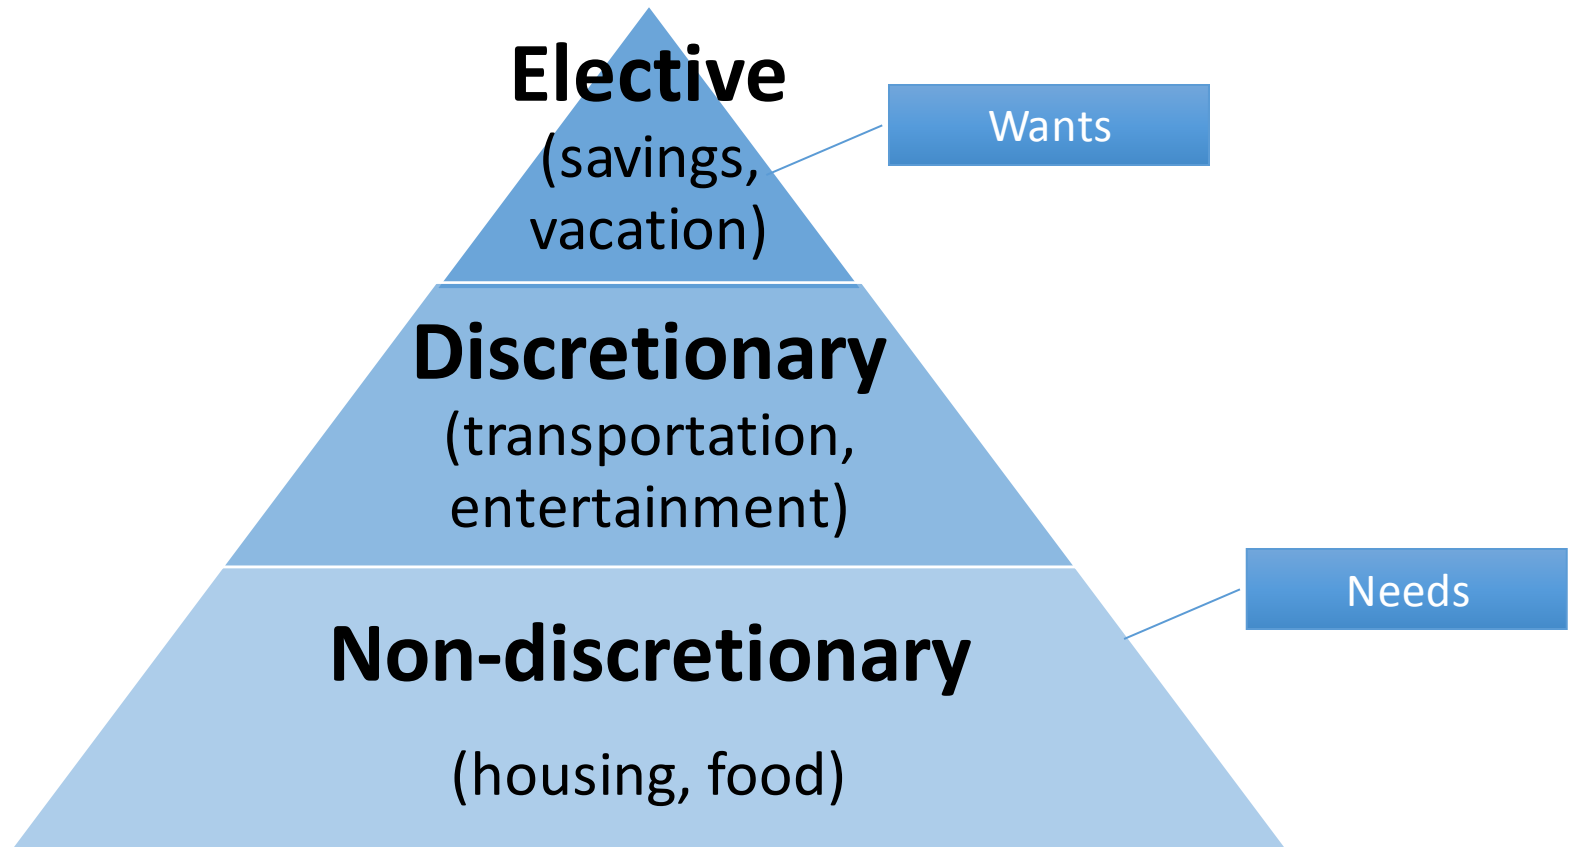

# Financial Strategy: Budget

- Create and adhere to a **budget**
- Cut back or eliminate unnecessary **expenses**
- Assess how long you can **go without income**
- Determine **alternate sources of income**

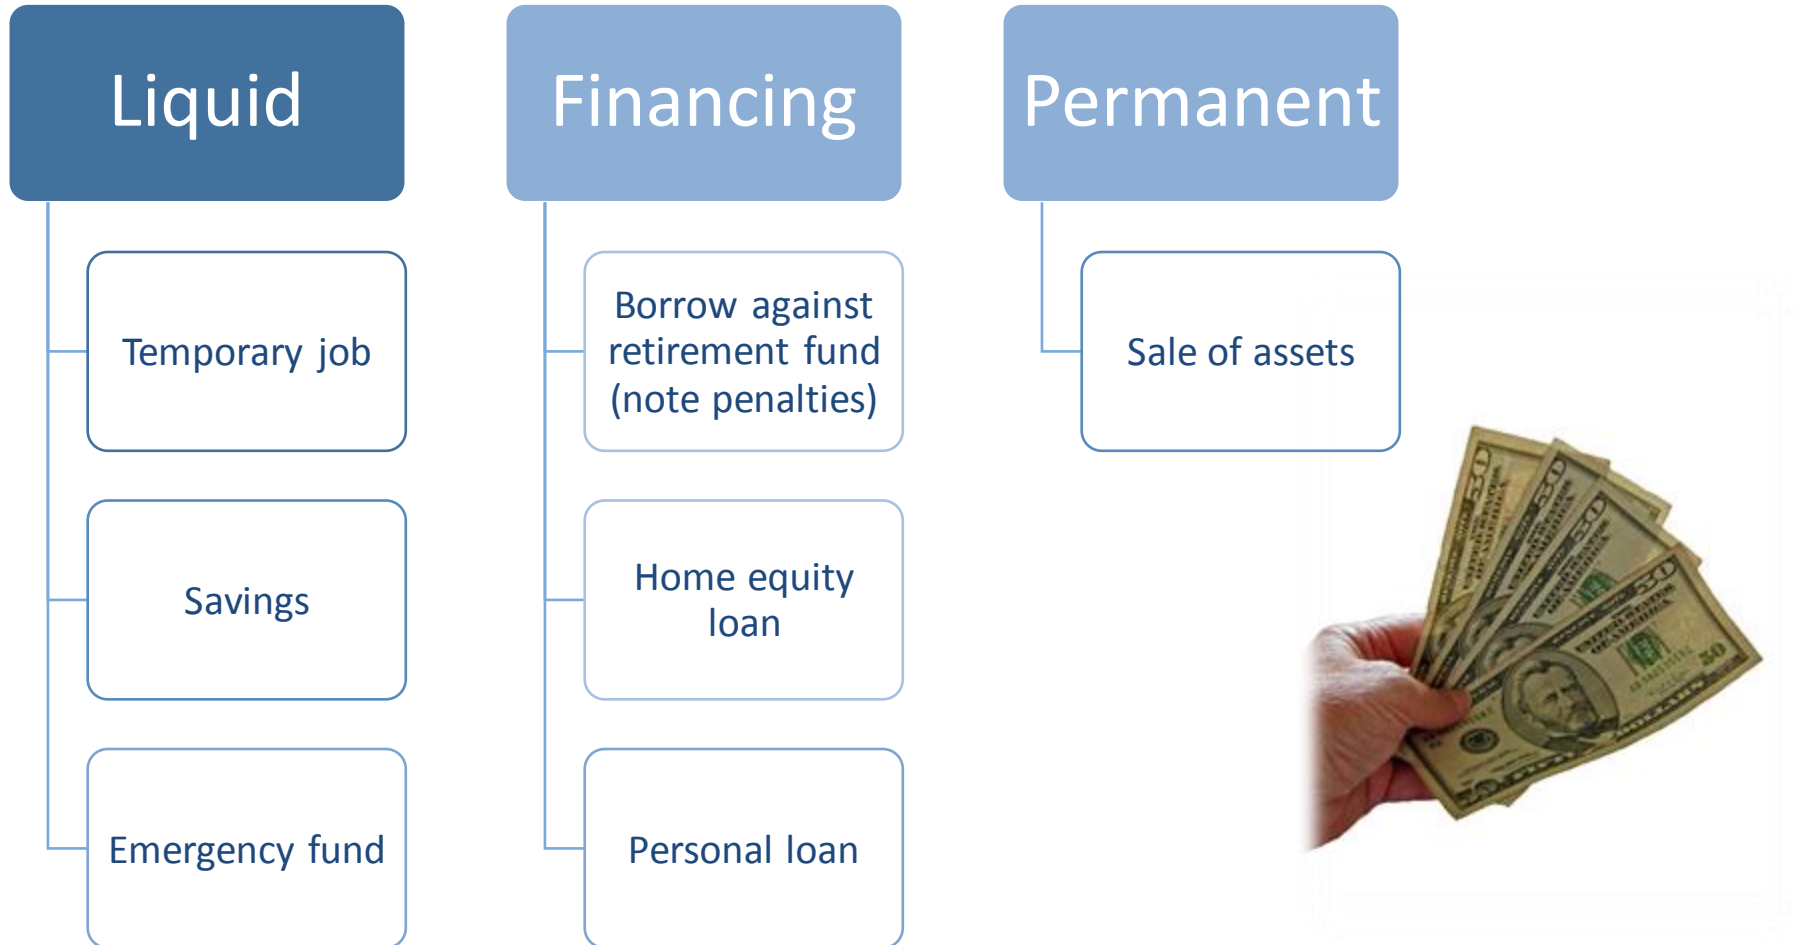

- Expenses

# Financial Strategy: Alternate Income Sources

# Financial Strategy: Duration without Income

➤ Equal to:

$$\frac{\text{Annual Projected Income}}{\text{Average Monthly Expenses}}$$

What can you pull from savings or other sources?

What are you obligated to spend each month – housing/utilities/food?

➤ Example:

$$\frac{\$12,000}{\$1,000}$$

= 12 months

# Creating A Company Target List

---
